Dear Hiring Team,

I am writing to express my interest in the Controls & Automation Engineering. With 10+ years designing, programming, and commissioning PLC, HMI, and SCADA systems across food, packaging, and industrial environments, including B&R, Bosch Rexroth, Siemens, and Allen Bradley platforms, I am well suited to support your automation standards and capital project delivery.

As Assistant Manager, Control Systems at Nilpeter India, I led the electrical team through installation and commissioning of flexographic printing machines, and previously delivered capital automation projects end-to-end at Bosch Rexroth and SEG Automotive, including auger filling systems for spice and flour applications and end-of-line test benches — direct experience with the commissioning and vendor-integration work this role requires. I have also built SQL/XLS-based data logging for production traceability and applied basic IIoT/Industry 4.0 concepts, a solid base to build on for the MES and analytics scope of this position.

Thank you for your consideration.

Sincerely,
Raghavendra Pokuri
