Control Systems Engineer | PLC | SCADA/HMI | Industrial Networks

PROFESSIONAL SUMMARY

Controls Specialist with 10+ years of experience developing PLC programs from scratch, commissioning and proving out machines, and diagnosing PLC, HMI, SCADA and motion control systems on site. Delivered automation for flexographic label printing, VFFS packaging, auger filling, welding and test equipment on Bosch Rexroth, B&R, Siemens and Allen Bradley platforms. Led an electrical team on UL and CE machines with safety PLC logic and supported customers across time zones through FAT, SAT, and remote and on-site service.

TECHNICAL SKILLS

- **PLC and Motion:** Bosch Rexroth, B&R, CODESYS, Siemens, Allen Bradley, Mitsubishi, Omron, Delta, Festo, Beckhoff, servo systems, VFD selection, integration and commissioning.
- **HMI and SCADA:** Bosch Rexroth (Winstudio), B&R, Siemens (WinCC), Allen Bradley, Indusoft, Mitsubishi, Pro-face, Delta, Omron.
- **Languages and Tools:** Ladder Logic, Structured Text, SFC, function blocks, PackML, Python (basic), VB Script, batch scripting, GitHub, Jira, Software Version Control.
- **Networks and Data:** RS232, RS485 Modbus-RTU, TCP/IP, Sercos, Profinet, Profibus, EtherCAT, EtherNet/IP, OPC (UA, DA); production data logging to XLS, PDF, RTF and SQL; I4.0 and IoT (basic).
- **Electrical Design:** Control circuit and panel design, control and switchgear selection, I/O and slave-device interfacing, pneumatic and servo mechanisms.
- **Core Competencies:** FAT, SAT, installation and commissioning, electrical troubleshooting, project management, presales technical support, training and mentoring.

KEY ACHIEVEMENTS

- Achieved high accuracy on a spice's/flour auger filling machine, including electrical installation and servo and VFD commissioning.
- Achieved micron-level weld accuracy on a battery welding machine for an end user.
- Achieved automatic registration control at high speed on a flexographic label printing machine using the B&R system.
- Introduced remote connectivity for machine support, improving customer confidence; recognized by clients for fast response across time zones.
- Received the "Excellent Customer Support" award at Bosch Rexroth.

WORK EXPERIENCE

Nilpeter India Pvt Ltd **Jan 2026 - Jul 2026**

External Consultant, Controls Systems (Remote)

- Provided remote technical support for flexographic label printing machines dispatched from the India manufacturing plant to customers in the Central America region.
- Made PLC program sequence changes remotely as required by customers for special jobs.
- Guided local installation teams for wiring issues, panel power-on sequence, safety PLC start-up and system readiness checks.
- Supported customer job trials, including calibration of infeed, pacing axis, rollers and load cells where required, and automatic registration trials.

Nilpeter India Pvt Ltd, Chennai, India **Apr 2023 - Oct 2025**

Assistant Manager, Control Systems

- Developed PLC programs from scratch, translating machine sequences and customer specifications into maintainable control logic on B&R, Bosch Rexroth, Siemens, Motion Control and Omron systems.
- Commissioned and proved out PLC programs on new flexographic label printing machines, validating I/O, motion, safety functions and sequence operation through to production-ready performance.
- Modified and optimized programs on existing machines for new requirements, process improvements and device upgrades, minimizing downtime.
- Diagnosed and resolved hardware and software issues on site; provided after-sales service and proved out special jobs at customer sites.
- Led the electrical team on design, schematics, wiring compliance and standards revision; monitored production of UL and CE machines with additional safety programming.

- Designed and programmed add-on machines and flexo lines (star wheel conveyor, semi-rotary die-cutting, stackers, sheeting stackers); guided the assembly team and streamlined R&D for higher speeds and new materials.

SEG Automotive, Bangalore, India **Jun 2021 - Apr 2023**

Assistant Manager, TEF

- Proved out alternator and e-motor electrical test benches, validating electrical parameters, insulation resistance, high-voltage leakage and performance curves.
- Performed end-of-line testing, calibration and troubleshooting of test stations to meet quality and safety standards; supported commissioning, data acquisition and integration with production workflows.

Bosch Rexroth (India) Pvt Ltd, Bangalore, India **Aug 2014 - Jun 2021**

Application Executive

- Developed and commissioned PLC, MLC and HMI logic for food, pharma, packaging, handling, gantry, synchronization, automotive and test-rig applications; 6+ years in Servo, VFD drives and control technology.
- Developed and commissioned VFFS (Vertical Form Fill Seal) packaging machine applications using Bosch Rexroth control and drive systems.
- Developed and Commissioned granite polishing, fuel rail labelling and laser marking machines.
- Upgraded and commissioned end-user machines; handled customer breakdowns on site; troubleshoot and reinstalled motion control systems; configured networks and drives.
- Prepared bills of materials and interfaced servos, VFD, solenoids and HMI with PLC per customer requirements; supported pre-sales enquiries and post-sale project execution.
- Sizing and installed VFDs for air handling unit (AHU), HVAC and mixer applications, integrating control through digital and analog I/O, Modbus RTU (RS485) and TCP/IP, with V/f and speed-torque control.
- Provided central technical support to regional engineers; coordinated field service calls across India; worked with R&D on customized logic.
- Trained OEM engineers, supported Sales with technical presentations and making of technical procedure documentation.

INDUSTRIAL APPLICATIONS

- Flexographic label printing machine with PackML and Structured Text on a B&R controller, including safety PLC versions for UL and CE approved machines.
- EV battery welding machine and line: Rexroth linear modules, servo systems, Siemens S7-1200 PLC, HMI and Miyachi welding controllers (Profinet, Modbus TCP/IP).
- Gallery pumps dry leak testing machine (WinStudio, Bosch PLC, HMI, SCADA integration).
- Developed a SCADA system that automatically creates year/month/day folders for production data logging from the PLC, keeping records organized and traceable.
- Spot welding data recording application for BS VI vehicle production: transferred weld data from the Bosch BOS6000 weld controller data tables to a local PC using WinStudio on a Rexroth VEP HMI/SCADA; created Excel reports and Microsoft SQL tables on the customer PC along with password management.
- Developed and commissioned a magnet pressing servo press using a Bosch Rexroth electro-mechanical cylinder (EMC) 10 kN load, 96 mm stroke, 3.5sec cycle.
- Linear friction stir-welding machine (40 kN capacity) for aluminium, magnesium, copper, titanium and their alloys: multi-axis control with integrated axis controller, hydraulic functions integrated under a single master controller, and alternating control mode for flexible welding; 20-micron accuracy.
- EPS connector test with harness, high voltage and vision system automation using Omron PLC, Festo stepper system, GE VersaMax and SCADA.
- Additional automation: sheet loader (13 bins), poka-yoke system (Omron PLC, LVDT, safety light curtains), micro-component drilling and tapping, stator and rotor height checking unit.

EDUCATION

Bachelor of Technology (B.Tech), Electrical and Electronics Engineering, Acharya Nagarjuna University, India
